

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A service processing system in which ~~a service for performing~~ specified multiple processings of document data ~~is~~are processed in a cooperative manner on a network, the system comprising:

an indication data creation part that ~~creates, for each job as a unit of the associated processings, creates~~ indication data to indicate ~~a processing procedure of the job, multiple processings performed to document data,~~ and notice condition data to indicate a ~~notice~~an event to be notified regarding the multiple processings and ~~a notice form thereof at each processing stage in the job;~~a way to notify the event;

at least one execution apparatus that performs the multiple processing based on the indication data;

a management ~~control part~~controller that manages progress ~~of each of the multiple processings in the job on the basis of contents recited in the indication data created by the indication data creation part;~~processings; and

a notice part that sends a notice during the progress ~~of each of the multiple processings in the job on the basis of~~based on contents recited in the notice condition data.

2. (Currently Amended) The service processing system according to claim 1, further ~~comprising~~comprising:

a notice form change part that ~~can change a notice form so that it differs from the contents~~varies the way to notify the event recited in the notice condition data in a case where a specific user performs ~~progress~~a processing different from ~~progress~~the multiple processings indicated ~~by~~in the indication data.

3. (Currently Amended) A service processing method in which ~~a service for performing~~ specified multiple processings of document data ~~is~~ are processed in a cooperative manner on a network, the method ~~comprising the steps of:~~ comprising:

~~creating, for each job as a unit of the associated processings,~~ indication data to indicate ~~a processing procedure of the job,~~ multiple processings performed to a document, and notice condition data to indicate ~~a notice~~ an event to be notified regarding the multiple processings and a ~~notice form thereof at each processing stage in the job;~~ way to notify the event;

~~managing progress of each of the associated processings in the job on the basis of contents recited in the created indication data;~~ processings; and

~~sending a notice during the progress of each of the multiple processings in the job on the basis of~~ based on contents recited in the notice condition data.

4. (Currently Amended) The service processing method according to claim 3, further comprising:

~~changing a notice form so that it differs from the contents~~ varying the way to notify the event recited in the notice condition data in a case where a specific user performs ~~progress~~ a processing different from ~~progress~~ the multiple processings indicated ~~by~~ in the indication data.

5. (Currently Amended) A job management device for managing progress of ~~each of multiple~~ processings in a service processing system in which ~~a service for performing specified~~ the multiple processings of document data ~~is~~ are processed in a cooperative manner on a network, the device comprising:

~~an indication data creation part that creates, for each job as a unit of the associated processings,~~ creates indication data to indicate ~~a processing procedure of the job,~~ the multiple processings, and notice condition data to indicate ~~a notice~~ an event to be notified

regarding the multiple processings and a ~~notice form thereof at each processing stage in the job;~~way to notify the event;

a management control part that manages progress of ~~each of the multiple processings in the job on the basis of contents recited in the indication data created by the indication data creation part;~~processings; and

a notice part that sends a notice during the progress of ~~each of the multiple processings in the job on the basis of~~based on contents recited in the notice condition data.

6. (Currently Amended) A job management device for managing progress of ~~each of multiple processings in a service processing system in which a service for performing specified the multiple processings of to document data is~~are processed in a cooperative manner on a network, the device comprising:

an indication data reception part that ~~receives, for each job as a unit of the associated processings,~~receives indication data to indicate ~~a processing procedure of the job, the multiple processing,~~ and notice condition data to indicate ~~a notice~~an event to be notified regarding the multiple processings and a ~~notice form thereof at each processing stage in the job;~~way to notify the event;

a management control part that manages progress of ~~each of the processings in the job on the basis of contents recited in the indication data received by the indication data reception part;~~the associated processings; and

a notice part that sends a notice during the progress of ~~each of the multiple processings in the job on the basis of~~based on contents recited in the notice condition data.

7. (Currently Amended) A service processing device ~~for processing a service in a service processing system in which the service for performing specified multiple processings of to document data is~~are processed in a cooperative manner on a network, the device comprising:

an indication data reception part that ~~receives, for each job as a unit of the~~  
~~associated processings, receives~~ indication data to indicate ~~a the multiple processing procedure~~  
~~of the job, processings,~~ and notice condition data to indicate ~~a notice an event to be notified~~  
~~regarding the multiple processings~~ and a ~~notice form thereof at each processing stage in the~~  
~~job; way to notify the event;~~

a management control part that manages progress of ~~each of the multiple~~  
~~processings in the job on the basis of contents recited in the indication data received by the~~  
~~indication data reception part; processings;~~ and

a notice part that sends a notice during the progress of ~~each of the multiple~~  
~~processings in the job on the basis of~~ based on contents recited in the notice condition data.

8. (Currently Amended) The job management device according to claim 6,  
wherein the notice part ~~gives~~ sends the notice of ~~execution completion~~ when the multiple  
~~processing processings of the job is are~~ completed.

9. (Currently Amended) The job management device according to claim 6,  
wherein the notice part sends ~~a notice the notice~~ in a case where ~~progress a processing~~  
different from ~~progress of the job~~ the multiple processings recited in the indication data  
occurs.

10. (Currently Amended) The job management device according to claim 6,  
wherein the notice part sends ~~a notice the notice~~ in a case where an access to a file for a secret  
document occurs.

11. (Currently Amended) The job management device according to claim 6,  
wherein the notice part sends ~~a notice the notice~~ in a case where login to a specified server  
occurs.

12. (Currently Amended) The job management device according to claim 6, wherein the notice part sends ~~a notice~~ the notice in a case where a ~~pay server or service~~ which needs to be paid is about to be executed.

13. (Currently Amended) The service processing device according to claim 7, wherein the notice part ~~gives~~ sends the notice of execution completion when the multiple processing processings of the job is are completed.

14. (Currently Amended) The service processing device according to claim 7, wherein the notice part sends ~~a notice~~ the notice in a case where ~~progress~~ a processing different from ~~progress of the job~~ the multiple processings recited in the indication data occurs.

15. (Currently Amended) The service processing device according to claim 7, wherein the notice part sends ~~a notice~~ the notice in a case where an access to a file for a secret document occurs.

16. (Currently Amended) The service processing device according to claim 7, wherein the notice part sends ~~a notice~~ the notice in a case where login to a specified server occurs.

17. (Currently Amended) The service processing device according to claim 7, wherein the notice part sends ~~a notice~~ the notice in a case where a ~~pay server or service~~ which needs to be paid is about to be executed.
